Office Action Summary	Application No. 10/796,899	Applicant(s) BRUGGER ET AL.	
	Examiner Phil Wiest	Art Unit 3761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

In the reply filed 7/16/08, applicant amended claims 7, 11-13, 16, and 17. Claims 7-9 and 11-17 are currently pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-9 and 11-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Polaschegg (US 5,098,373). Polaschegg teaches an extracorporeal system comprising a filter 50, an arterial blood line 35 and venous blood line 45 that convey blood to and from a patient access 10, a pump 30 configured to convey blood to convey blood through the arterial blood line, a pressure sensor 31 located upstream of the pump that senses pressure in the arterial blood line, and a controller 37 connected to the pump and sensor, such that it receives a pressure signal from said sensor 31 and controls the flow rate of the pump 30. The controller 37 has a programmed algorithm for maintaining constant arterial pressure, such that it is configured to maintain a constant pressure in the arterial blood line by regulating the speed of the pump in response to the sensed pressure, thereby maintaining a specific predetermined pressure range (see Figure 1 and columns 5-8). Regarding Claims 12 and 17, the

Art Unit: 3761

controller is configured to reduce flow rate when the resistance to blood flow increases (i.e. the controller is configured to slow the flow rate when pressure drops, as per claims 8 and 14).

Response to Arguments

Applicant's arguments with respect to claims 7-9 and 11-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
